Information in this document is subject to change without notice.

Sony, VAIO and CLIE are trademarks or registered trademarks of Sony. Microsoft, Windows, Windows Media, Outlook, Bookshelf and other Microsoft products are trademarks or registered trademarks

of Microsoft Corporation in the United States and other countries.

The word Bluetooth and the Bluetooth logo are trademarks of Bluetooth SIG, Inc. AMD, AMD logo, AMD Duron and combinations thereof, 3DNow!, are trademarks of Advanced Micro Devices, Inc. Intel Inside logo, Pentium and Celeron are trademarks or registered trademarks of Intel Corporation. Transmeta, the Transmeta logo, Crusoe Processor, the Crusoe logo and combinations thereof are trademarks of Transmeta Corporation in the USA and other countries. Graffiti, HotSync, PalmModem, and Palm OS are registered trademarks, and the Hotsync logo and Palm are trademarks of Palm, Inc. or its subsidiaries. (M) and Motorola are trademarks of Motorola, Inc. Other Motorola products and services with (R) mark like Dragomball are the trademarks of Motorola, Inc.

All other names of systems, products and services in this manual are trademarks or registered trademarks of their respective owners.

In this manual, the (TM) or (R) mark are not specified.

Caution Markings for Lithium/Ion Battery - The following or similar texts shall be provided on battery pack of equipment or in both the operating and the service instructions.

CAUTION: Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

CAUTION: The battery pack used in this device may present a fire or chemical burn hazard if mistreated. Do not disassemble, heat above 100°C (212°F) or incinerate.

Dispose of used battery promptly.

Keep away from children.

CAUTION: Changing the back up battery.

- Overcharging, short circuiting, reverse charging, mutilation or incineration of the cells must be avoided to prevent one or more of the following occurrences; release of toxic materials, release of hydrogen and/or oxygen gas, rise in surface temperature.
- If a cell has leaked or vented, it should be replaced immediately while avoiding to touch it without any protection.

Service and Inspection Precautions

1. Obey precautionary markings and instructions

Labels and stamps on the cabinet, chassis, and components identify areas requiring special precautions. Be sure to observe these precautions, as well as all precautions listed in the operating manual and other associated documents.

2. Use designated parts only

The set's components possess important safety characteristics, such as noncombustibility and the ability to tolerate large voltages. Be sure that replacement parts possess the same safety characteristics as the originals. Also remember that the \triangle mark, which appears in circuit diagrams and parts lists, denotes components that have particularly important safety functions; be extra sure to use only the designated components.

3. Always follow the original design when mounting parts and routing wires

The original layout includes various safety features, such as inclusion of insulating materials (tubes and tape) and the mounting of parts above the printer board. In addition, internal wiring has been routed and clamped so as to keep it away from hot or high-voltage parts. When mounting parts or routing wires, therefore, be sure to duplicate the original layout.

4. Inspect after completing service

After servicing, inspect to make sure that all

screws, components, and wiring have been returned to their original condition. Also check the area around the repair location to ensure that repair work has caused no damage, and confirm safety.

5. When replacing chip components...

Never reuse components. Also remember that the negative side of tantalum capacitors is easily damaged by heat.

6. When handling flexible print boards...

- The temperature of the soldering-iron tip should be about 270°C.
- Do not apply the tip more than three times to the same pattern.
- Handle patterns with care; never apply force.

Caution: Remember that hard disk drives are easily damaged by vibration. Always handle with care.

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFÉS PAR UNE MARQUE \triangle SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

DISASSEMBLY

DISASSEMBLY

[To Flowchart](#)

Slide cover assy

1 SLIDE COVER ASSY

- 1 Move, by sliding, the slide cover assy upward until the connectors on the rear of the set is exposed.
- 2 While pushing the portion (A), move, by sliding, the slide cover assy further upward until the lock is released.
- 3 Remove the slide cover assy on the direction of the arrow.

DISASSEMBLY

[To Flowchart](#)

2 MEMORY

- 1 Remove the two screws.

- 2 Disengage the three detents and remove the memory cover.

- 3 Open the two clips.

- 4 Pull out the memory module (*1) from the board in the vertical direction.

Notes when installing the Memory module

- (1) While the clips are left open, insert the Memory module so that the protrusion of socket enters into the notch of the Memory module.
- (2) When the Memory module is inserted completely, check that the clips are closed.
- (3) Be sure to insert the Memory modules starting from the having the smallest bank number.

(*1) Two memory modules are installed on model V520G and V620G.

DISASSEMBLY

3

Acetate tape
Route the two black harness through the notch as shown.

To replace the CPU or heat sink (in case that CPU is equipped with heat sink), install new CPU or heat sink after thermal dissipation grease is wiped off and apply the grease to the position shown in the figure.

Thermal dissipation grease: Silicon compound (G-765) 90G
Amount of application: 0.5 g (equivalent to twice the size a wooden safety match head)

* Take care not to apply the grease to any other places because it has high conductivity.

Grease
(on the entire surface of heat splitter)

Notes on installing the DC fan

During installation, be careful not to damage the chips on the Mother Board as shown in the illustration.

13 DC FAN, CPU

- 1 Peel off the acetate tape.
- 2 Disconnect the two connectors.
- 3 Remove the four screws included in the DC fan.
- 4 Raise the lever in the direction of the arrow(A).
- 5 Pull the CPU straight up and remove it.

DISASSEMBLY

To Flowchart

Bind the harnesses with the wire clamp.
(Purse Lock DIA.8)

When assembling, Route the harness (❶) in the shown the pictures. (*1)

Harness clip

Two guides

When assembling, press the UL tape with finger in the way of tracing the UL tape from one end up to the other end.

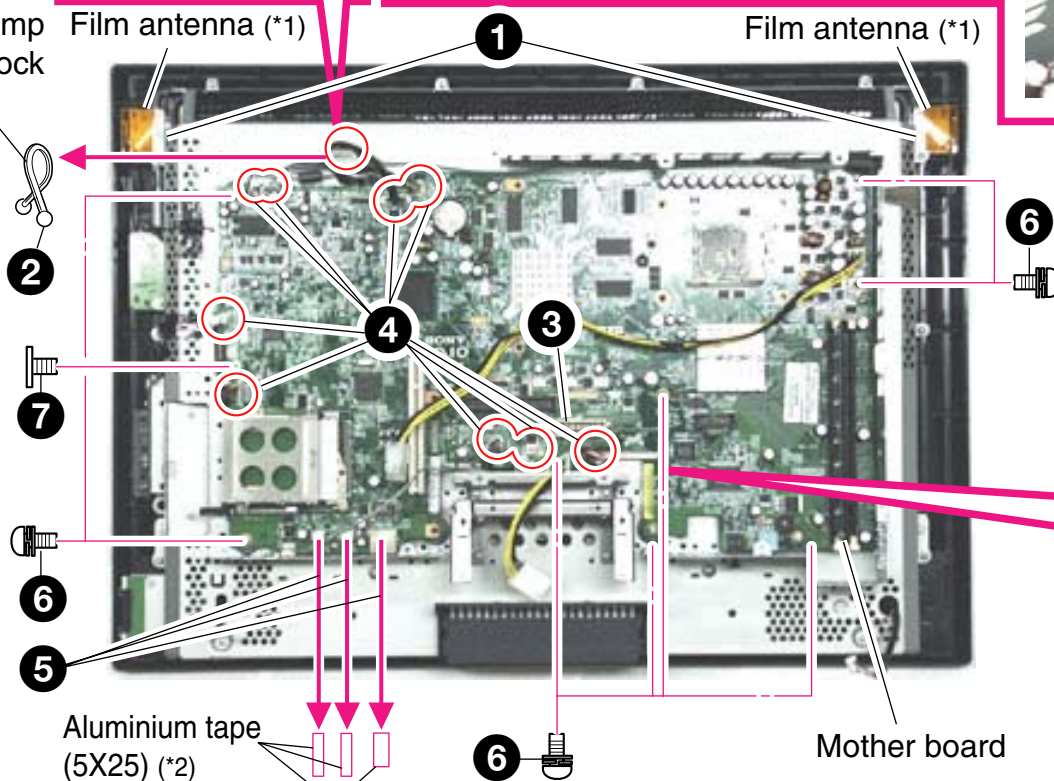

Route the harness through the notch as shown.

Wire clamp
(Purse lock DIA.8)

PARTS LIST

NOTE :

- The parts listed here are for service, and therefore they may be different from the parts shown in circuit diagrams or used in the set.
- # Parts/components that are available in the commercial market.
- The number of the mark “2” is the quantity at the time of preinstallment.

Basic List

- The parts in the “Basic List” will be refer red to as the part list.
The part order should be taken place based on the part number in the list.

Substitution List

- If the repair part in the “Basic List” was not available, refer to order the “Substitution List” if available.

The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque Δ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.
